## In the claims

The following amendments are made with respect to the claims in the International application PCT/GB2004/004006.

This listing of claims will replace all prior versions and listings of claims in this application.

- 1 (original). A sensor comprising at least first and second electrodes and a volume therebetween for receiving a liquid sample, and which includes an agent that lyses cells, wherein the lysing agent is in or on the surface of the first electrode.
- 2 (currently amended). [[A]] <u>The</u> sensor according to claim 1, which also comprises an enzyme of which glucose is a substrate.
- 3 (currently amended). [[A]] <u>The</u> sensor according to <u>either preceding-claim\_1</u>, which also comprises a spreading layer over at least the first electrode.
- 4 (currently amended). [[A]] <u>The</u> sensor according to <u>any preceding claim 1</u>, wherein the lysing agent is comprised in a layer applied onto the first electrode.
- 5 (currently amended). [[A]] <u>The</u> sensor according to claim 4, wherein an enzyme and/or a mediator are applied in one or more additional layers on the first electrode.
- 6 (currently amended). [[A]] <u>The</u> sensor according to <u>any of claims 1 to 3 claim 1</u>, wherein the lysing agent is comprised in the first electrode.
- 7 (currently amended). [[A]] <u>The</u> sensor according to claim 6, wherein the first electrode comprises a carbon layer and, on top thereof, a carbon layer including the lysing agent.
- 8 (currently amended). [[A]] sensor according to any preceding claim\_1, wherein the lysing agent lyses red blood cells.
